

# BOOK YOUR STEPS COURSE TODAY!

Our STEPS courses are designed to provide participants with clinical education on a variety of topics related to improving the provision process and outcomes including manual wheelchairs, power wheelchairs, and seating. Each course is conducted in a workshop format including lectures, discussions, and hands-on activities to provide the most optimal learning experience.

In addition to pre-scheduled courses, we offer a Pop-Up Roadshow option for groups where we bring the training to you. All of our STEPS courses are available this way for 2025. We can also create bespoke training for your organisation's needs. Get in touch with your local Area Sales Manager for further details.

To book your place, please scan the QR code or visit:
