

Parallel Session 4

Prescribing to meet the ongoing needs of people living with MND: overcoming catch up

Presenter: Jenny Rolfe

In this work shop delegates will participate in an active learning session with the following aims:

- Reflect on current service delivery to MND clients
- Review current knowledge about MND and different forms of presentations of the disease
- Identify common postural and function problems experienced by people with MND
- Review equipment which is most effective in meeting the postural and functional needs of MND clients
- Reflect on prescribing practice and how new learning may influence practice in the future

This is an interactive session where participation and sharing of experiences will enhance the learning.
