Master Data Management between Hospitals & Suppliers: Current & Future

Explore how Unique Device Identification is used in the hospital and why it is important. A case study of the Scan4Safety Programme in University Hospitals Plymouth NHS Trust. Understanding how master data is managed currently in the hospitals and how hospitals retrieve data from suppliers. How Global Data Synchronisation Network® can improve a hospital's master data and save significant time and money for both suppliers and hospitals.
Lei Hu, Head of Supply Chain Operations
Oxford University Hospitals NHS Foundation Trust

14:40-15:30

Understanding and applying BS 8625 Selection, Placement and Fixation of Flexible Postural Support Devices in Seating

Barend ter Haar, CEO
